PROJECTS

Movie App – <https://daveryde-movieapp.herokuapp.com>

Application that gives users access to a vast database of movies, trailers, and details. Built using react with redux, designed using SASS and paired with a node.js backend connected to the TMDb API.

Roster App - <https://arcane-retreat-70868.herokuapp.com>

RosterApp was developed for users to quickly and easily create a print-friendly formatted photo roster using only a unique id number from an external image data base. Built using nodeJS with ExpressJS backend connected to external database using MongoDB while design and paired with Handlebars.js and bootstrap.
