DAVID CORDOVA

SENIOR FULL STACK SOFTWARE ENGINEER

(623) 521-2918 • davidhcordova411@gmail.com • Portfolio • GitHub • LinkedIn

PROFESSIONAL SUMMARY

Senior Full Stack Software Engineer with 7 years of experience designing scalable data architectures, cloud microservices, and mission-critical web applications. Proven track record pairing pragmatic customer empathy with rigorous systems execution—protecting critical customer-valued legacy reporting obligations while driving zero-downtime migrations to modern cloud and warehouse platforms.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript (ES6+), Python, SQL, HTML5, CSS3, Bash
- **Data & Warehousing:** Snowflake, SCD2 Modeling, ETL Pipelines, PostgreSQL, MongoDB, MySQL
- **Frontend:** React, Redux, Zustand, Next.js, Material-UI (MUI), Ionic, Context API
- **Backend & APIs:** Node.js, Express.js, Django, Django REST Framework, Bottle, GraphQL, RESTful APIs
- **Cloud & DevOps:** AWS, AI Agent Workflows, Docker, GitHub Actions CI/CD, Datadog

PROFESSIONAL EXPERIENCE

Evress Analytics — Remote

Senior Full Stack Software Engineer | 2023 – Present

- **Data Modeling & Warehouse Architecture:** Modeled comprehensive SIS data domains, robust ETL procedures, and configuration-driven filter views using SCD2 slowly changing dimensions in Snowflake, supporting dynamic reporting and agentic exploration of warehouse data.
- **Legacy Optimization & Customer Continuity:** Maintained and optimized critical legacy reporting pipelines serving binding district obligations, introducing parallelization and advanced ETL patterns that slashed runtimes from 21 hours down to 1 hour (95% reduction), while architecting the transition of core capabilities into Snowflake without disruption.
- **AI Agent Workflows & Operational Reliability:** Designed and shipped vendor data ingestion AI agent workflows automating complex data resolution pipelines to accelerate customer success operations; led district data validation through deduplication and grain verification to a production handoff point.

GoSchoolBox — Remote

Senior Full Stack Software Engineer | Nov 2021 – 2023

- **Cloud Infrastructure & CI/CD Modernization:** Modernized platform hosting by migrating infrastructure from Heroku to AWS ECS Fargate with updated CI/CD support, and transitioned code repository management and deployment pipelines from GitLab to GitHub Actions—improving system scalability and cutting high-traffic page load times from minutes to under 2–3 seconds.
- **Serverless Architecture & File Streaming:** Decoupled heavy file transfers from the monolithic MERN/GraphQL stack into an event-driven AWS Lambda microservice that streams user files directly from S3 to Lessonspace APIs, unblocking essential customer operations and introducing AWS CloudWatch monitoring.

Cyber Dive — Mesa, AZ

Full Stack Software Engineer | Dec 2019 – Oct 2021

- **Distributed Systems & Asynchronous Processing:** Engineered distributed full-stack services utilizing Python (Bottle, Django REST Framework), Node.js, and MongoDB/PostgreSQL; built and maintained asynchronous task workers using Celery and RabbitMQ to decouple message-broker processing and scale transaction throughput.
- **Cloud Infrastructure & Quality Engineering:** Maintained automated CI/CD deployment pipelines using Docker Swarm, Linux, and Bash scripting; authored unit, integration, and end-to-end test suites across Pytest, Jest, and Cypress while delivering cross-platform mobile/web frontends using React, Zustand, and Ionic.

EDUCATION

- **Arizona State University** — Bachelor of Applied Science (BAS) in Internet and Web Development (2019 – 2021)
- **Central Arizona College** — Associate of Applied Science (AAS) in Web Development (2017 – 2019)
